## SUMMARY

Software Engineer with 6+ years of experience designing and developing responsive, scalable, and high-performance web applications. Expert in React.js, Next.js, Redux, JavaScript/TypeScript, and Node.js, with hands-on experience building client-facing features, integrating APIs, and optimizing user interfaces for performance and accessibility. Proven ability to work in cross-functional Agile teams, mentor junior developers, implement test-driven development, and contribute to infrastructure improvements. Passionate about delivering high-quality digital experiences that have measurable business impact.

## KEY QUALIFICATIONS

- Strong expertise in building **scalable, responsive web applications** using **React.js, Next.js, and Redux**, delivering dynamic user interfaces with consistent performance across devices.
- Proven experience designing and consuming **RESTful and GraphQL APIs** using **Node.js and Express.js**, enabling efficient data access and system integration.
- Hands-on experience with **MongoDB and MySQL**, including **schema design, data modeling, and performance optimization** for complex queries.
- Built **data-intensive and visualization-heavy user interfaces** using **Ag-Grid** and modern charting libraries (**Chart.js, D3.js, Highcharts**), efficiently rendering large datasets with interactive filtering, sorting, and pagination.
- Developed **geospatial visualizations and map-based interfaces** using **Google Maps API and Leaflet**, integrating location-based data and interactive map layers into React applications.
- Implemented **Material UI (MUI), Styled Components, Tailwind CSS, Bootstrap** to build consistent, accessible, and scalable design systems, leveraging theming, responsive components, and design tokens.
- Demonstrated ability in **full-stack JavaScript development**, integrating frontend and backend systems to deliver cohesive, end-to-end application workflows.
- Proficient with **Git-based workflows** (Git, GitHub, Bitbucket), contributing in **Agile teams** with CI/CD practices and collaborative development standards.
- Developed **CMS-driven applications** using **Storyblok**, enabling dynamic content management and reducing developer dependency for content updates.
- Hands-on with **Azure DevOps** and **CI/CD pipelines**, supporting deployment and management of scalable web applications with automated testing and containerized environments.
- Implemented **test-driven development (TDD)** practices, writing **unit and integration tests** using **Jest and React Testing Library (RTL)**, with additional experience in Cypress for end-to-end workflow verification.
- Proven leadership in **UI ownership**, including **code reviews, mentoring junior developers, and cross-functional collaboration** to ensure high-quality end-to-end delivery.

## TECHNICAL SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, SQL, Python, Java
- **Frontend Frameworks & Libraries:** React.js (Hooks, Context API), Next.js (App Router), Redux
- **UI, Component & Visualization Libraries:** Ag-Grid, Material UI (MUI), Styled Components, Bootstrap, Tailwind CSS, Chart.js, D3.js, Highcharts
- **Frontend Engineering Practices:** Responsive and mobile-first design, Accessibility (WCAG), Component-based architecture, Performance optimization, State management patterns
- **Backend & APIs:** Node.js, Express.js, RESTful APIs, GraphQL, Microservices-based architecture, Authentication and authorization patterns
- **Databases:** MongoDB, MySQL, PostgreSQL, Schema design, Data modeling, Query optimization

- **Testing & Quality:** ESLint, React Testing Library (RTL), Jest, Cypress, Test-Driven Development (TDD), Unit, integration, and end-to-end testing
- **DevOps & Tooling:** Git, GitHub, Bitbucket, CI/CD pipelines (GitHub Actions, Jenkins), Docker, Postman, Swagger, Chrome DevTools
- **Cloud & Deployment:** Azure (strong), AWS (basic), Vercel, Netlify
- **Methodologies & Collaboration:** Agile/Scrum, Code reviews, Modular development, Reusable component design, Cross-functional collaboration

## WORK EXPERIENCE

---

**Client: Goldman Sachs**

**Publicis Sapient | Web Developer**

**January 2022 – January 2024**

- Developed **secure, enterprise-grade financial web applications** using **React.js, Next.js (App Router), Redux, and TypeScript**, delivering high-performance, responsive UIs for data-intensive platforms.
- Integrated **RESTful APIs and microservices backends**, enabling real-time updates and optimized data flow.
- Implemented **form validations** and complex **user input workflows**, ensuring accurate and reliable data entry.
- Practiced **test-driven development (TDD)** using **Jest, React Testing Library (RTL), and Cypress**, covering unit, integration, and end-to-end tests.
- Performed **performance optimization** and ensured **accessibility compliance (WCAG)** across devices.
- Mentored junior developers and conducted code reviews to enforce **frontend best practices**.
- Leveraged **Ag-Grid** for dashboards, efficiently handling sorting, filtering, and pagination for large JSON datasets.
- Collaborated with DevOps teams to deploy and maintain applications in **Azure-based environments**, integrating CI/CD pipelines and cloud-hosted services for reliable, scalable, and secure releases.

**Key Technologies:** React.js, Next.js (App Router), Redux, TypeScript, JavaScript (ES6+), Node.js, Express.js, MongoDB, RESTful APIs, Ag-Grid, HTML5, CSS3, Jest, React Testing Library, Cypress, CI/CD workflows

**Infosys Limited | Technology Analyst**

**July 2018 – December 2021**

**Project 1: Stock Market Visualization Tool**

- Developed a **real-time stock market dashboard** using **React.js, JavaScript, Chart.js, Highcharts, and D3.js**, integrating external REST APIs for live data.
- Designed **modular, reusable components** and responsive layouts using CSS Flexbox and Grid.
- Implemented **interactive charts, trend analysis, and dynamic filtering**, optimizing rendering for large datasets.

**Key Technologies:** React.js, JavaScript (ES6+), Chart.js, Highcharts, D3.js, RESTful APIs, HTML5, CSS3

**Project 2: E-commerce Application**

- Led frontend development using **React.js, Next.js, and Storyblok CMS**, integrating **Figma designs** to create pixel-perfect, responsive interfaces.
- Built **reusable React components and shared UI modules** using functional components, **React Hooks, lifecycle concepts** with JSX code and implementing advanced state management for cart, filtering, and order tracking workflows.
- Integrated **RESTful APIs** and implemented authentication, maintaining **real-time inventory updates**.
- Applied **Next.js server-side rendering** for SEO optimization and improved page performance.
- Mentored junior developers and established **scalable frontend architecture best practices**.

**Key Technologies:** React.js, Next.js, Redux, Storyblok CMS, RESTful APIs, HTML5, CSS3, JavaScript (ES6+), Figma

## EDUCATION

---

- **New Mexico State University, Las Cruces, NM** **2024 - 2025**  
Master's in computer science **CGPA: 3.8/4.00**
- **Sree Vidyanikethan Engineering College, Tirupati, India** **2014 - 2018**  
B. Tech in Computer Science and Engineering **CGPA: 7.89/10**
